

VProp Trader 2-Step Challenge Account – Terms and Conditions

These Terms and Conditions govern the use of VProp Trader's 2-Step Evaluation Account. By purchasing or using this product, you agree to all rules and conditions stated herein.

1. Discipline and Progression

1.1 Structured for Growth

The 2-Step Challenge is designed to evaluate not only your profitability but also your consistency and risk control across two progressive steps. Strategic discipline is critical to success.

2. Evaluation Steps and Trading Rules

2.1 Step 1 - Challenge

You must achieve a **10% profit target** with a **maximum daily loss of 5%** and **maximum total loss of 10%**. A minimum of **4 trading days** is required.

2.2 Step 2 - Evaluation

You must achieve a **5% profit target** with the **same risk parameters**: 5% daily loss and 10% total loss. A minimum of **4 trading days** is also required in this step.

2.3 Maximum Daily Loss (5%)

Your daily loss, including both closed trades and floating losses, must not exceed **5%** of your account's starting balance.

2.4 Maximum Total Loss (10%)

Your account balance or equity must not fall more than **10%** below the initial starting balance at any time. Violating this rule will result in disqualification.

2.5 News and Weekend Restrictions

Basic Account:

1. **Funded Stage:** You are not allowed to open or close trades within 2 minutes before or after major news events. Overnight positions and weekend trading are also not allowed.
2. **However, in Step 1 and Step 2:** News trading, overnight positions, and weekend trading are allowed.
3. **Violation of this rule** will result in the affected trades being removed and the challenge being marked as failed.

Pro Account:

News trading, weekend trading, and overnight positions are all allowed.

2.6 Trading Strategy Guidelines

Trade freely, but the following are strictly **prohibited**:

- Gap trading
- Latency or reverse arbitrage
- High-frequency trading
- Server manipulation or spamming
- Tick scalping
- Third-party copy trading or trade management
- Hedging strategies across multiple accounts

Permitted: Use of third-party EAs **only** for trade or risk management.

2.7 Minimum Trading Days

Each step requires **at least 4 separate trading days**, with at least one trade executed per day.

2.8 Account Leverage

Basic Account:

Instrument	Leverage
Forex/Gold	1:100
CFD/Indices	1:20
Cryptocurrency	1:1

Pro Account:

Instrument	Leverage
Forex/Gold	1:30
CFD/Indices	1:10
Cryptocurrency	1:1

2.8 Consistency Score Requirement

For Basic \$100,000 and Basic \$200,000 accounts in the Funded Step, traders are required to maintain a Consistency Score within 35% at the time of withdrawal assessment. The Consistency Score is calculated as the sum of profits earned on the trader's most profitable day divided by the total profits earned since the last withdrawal. Failure to meet the minimum Consistency Score requirement will not result in account failure but would limit withdrawal eligibility until the requirement is met.

3. Account Use & Restrictions

3.1 Account Credentials

You will receive your MT5 login credentials upon purchase. Changing them is prohibited and may result in account suspension.

3.2 Independent Trading Required

All trading must be done by you. No trade copying, signal bots, or account management services are allowed. Monitoring software is in place to detect violations.

4. Funded Account & Rewards

4.1 Funded Status

Upon successfully completing both steps, your account will be reviewed. If approved, you will receive a **funded account**.

4.2 Payouts

- You will receive a reward after 14 days of live trading on the funded account, **provided that** the profit from the profit share is more than **\$50**.
 - **Profit Share:** All eligible profits will be paid out at an **80% profit share rate**.
-

5. Refund Policy

5.1 Evaluation Fee

All evaluation fees are **refundable during first payout**.

6. IP Address Region Consistency

To maintain the integrity of the evaluation process and ensure account security, the region of your IP address used to:

- Purchase the evaluation
- Log into the V Prop Trader dashboard
- Access your trading account (during both the Evaluation Phase and the Funded Account)

must remain reasonably consistent.

If our Risk Team detects a sudden or suspicious change in your IP address region, we may reach out for verification and request supporting documentation.

Using a VPS or VPN for Trading

You may use a VPS or VPN throughout your challenge.

However, if our Risk Team identifies a change in your IP region, we may request verification. Acceptable proof may include:

- Proof of ownership for the VPS or VPN, such as an invoice with your name
- Use of a static IP address, which we can whitelist to avoid unnecessary disruption

Trading While Traveling

You are allowed to travel and trade from anywhere using your V Prop Trader account. While using the same IP address is not mandatory, any change in IP location must follow a consistent and realistic pattern.

If a sudden or unrealistic change in your IP activity is detected, our team may request verification. Acceptable proof may include:

- A boarding pass or plane ticket showing your travel details
- A passport stamp confirming entry into the new region
- A short live video demonstrating your presence at the new location

This verification process is in place to protect your account and ensure access is restricted to authorized individuals only.

7. Inactivity Policy

An account will be deemed expired and deactivated if no trades are executed for 30 consecutive days. To maintain active status, traders must log in and place at least one trade within every 30-day period.

Inactive accounts (no trades for 30 days) consume resources and may impact platform performance for active traders. Maintaining activity ensures compliance and helps us optimize resources for a smooth trading environment.
